

## THERE'S POWER IN THE Partnership

### ABOUT OMNIA PARTNERS, PUBLIC SECTOR

OMNIA Partners, Public Sector is the largest and most experienced cooperative purchasing organization dedicated to public sector procurement. Shaping the future of procurement through **power, access** and **trust**.

### ABOUT BROCK USA

Brock USA believes in one simple truth about sports: Protecting athletes, protects the game. Brock USA is the industry leader in shock pads for artificial turf with the largest body of scientific data proving their ability to maintain the highest performance of the field, and marry it with unmatched safety for the athlete. Concussions and concerns about all levels of head and body trauma are driving accelerated use of shock pads under artificial turf.

Beyond safety, their Cradle to Cradle environmental certification and warranties far outlast the turf, ensuring owners their investment will last. Schools, parks and other public institutions choose Brock USA for their quality, service, and scientific approach to the crucial area of athlete safety, and overall field longevity and performance.

Region 4 Education Service Center, Houston, TX has awarded a cooperative purchasing agreement for Sport Surfaces, Installation and Related Material. This competitively solicited and publicly awarded contract is available to agencies via OMNIA Partners.

### Contract #R162202

## Sport Surfaces, Installation & Related Material

# BROCK USA

## THE SAFEST CHOICE

You wouldn't buy a used, recycled helmet to put on a valued athlete, and a shock pad under your turf performs the same function. Each year Brock USA partners with hundreds of schools, parks, universities, and professional leagues on their artificial turf projects. Artificial turf fields are now a sophisticated system of components all aimed at mimicking a quality natural turf playing surface. The University of Tennessee Center for Athletic Field Safety provided the benchmarks to do just that.

Brock USA has studied the brain, concussions, footing, speed, and how the surface impacts the athlete – literally. These fields are built for the players in your program today, but they need to last for years to come – without degrading in safety or performance. It also needs to work for your climate and the hours of use needed. Brock USA's long history in all climates, at all levels of play, and under every turf brand, has provide unmatched knowledge about how to help you with your project, and reduce risk to your athletes and programs.
