

Cleaning Protocols to Help Prevent the Spread of Illness-Causing Germs

The power of prevention is yours

Disinfect Hard Surfaces

STEP 1	STEP 2	STEP 3	STEP 4
For heavily soiled surfaces, clean off excess dirt.	Thoroughly wet surface by using a disinfecting wipe or disinfecting solution in spray bottle.	Allow disinfecting solution to contact surface for minimum contact time (according to the product label) and rinse if necessary.	If there's excess disinfectant or water, wipe off and air dry.

A Checklist of Surfaces to Disinfect

BATHROOMS

- Sinks
- Faucets
- Counters
- Toilets & Urinals
- Door Handles
- Dispenser Pulls
- Light Switches
- Trash Cans
- Floors

For more information visit, www.CloroxPro.com. Always use products as directed. The U.S. Environmental Protection Agency (EPA) has announced that registered disinfectants effective against Influenza A are also effective against H1N1 flu virus on nonporous surfaces. Instructions for how to disinfect EPA-registered products can be found on the product label.

For more information on purchasing CloroxPro products through NETWORK's competitively solicited cooperative contract, please contact your regional OMNIA Partners representative at <https://www.omniapartners.com/publicsector/contact-us>
