

D7™ ANTIMICROBIAL DISINFECTANT

D7 is an effective and safe antimicrobial disinfectant that kills bacteria, fungi, germs and viruses in minutes. D7 utilizes cutting-edge technology to capitalize on the natural cleaning power of hydrogen peroxide. D7 can be applied to hard, non-porous surfaces like building exteriors, roofs, sidewalks, playgrounds and more, providing you the assurance of clean and safe facilities. D7 has demonstrated effectiveness against viruses like the coronavirus/ COVID-19.*

Quick Info

Proven protection: An effective and safe antimicrobial disinfectant

Fast acting: Only requires 10 minute contact time

Resilient: Specialized formula sanitizes down to the molecular level

Versatile: Can be applied to exterior or interior surfaces

Environmentally friendly: Contains zero VOCs and is biodegradable and safe to use

Easy to apply: Easily mixed and applied as direct spray, foam or fog with standard low-pressure pump or pneumatic sprayers; can also be applied by hand with a cloth

Non-abrasive: Provides powerful and safe protection

EPA registered: Meets the demands of strict environmental laws and regulatory requirements

**D7 can be used against COVID-19 when used in accordance with the directions for use against Norovirus. Refer to "For Use as a Disinfectant/Virucide/Fungicide/Deodorizer" in the D7 Application Guide for specific instructions.*

THE TOP ATTRIBUTES OF D7...

AND WHY THEY MATTER TO YOU

Proven protection: – D7 is an effective and safe antimicrobial disinfectant that kills bacteria, fungi, germs and viruses in minutes. D7 has demonstrated effectiveness against viruses like the coronavirus/COVID-19.

Why it matters – You can rest assured knowing that your facility and all interior and exterior contact touch points where D7 is applied will be disinfected, minimizing exposure and the spread of dangerous viruses.

Fast acting – D7 disinfects surfaces after only a 10 minute contact time.

Why it matters – Works fast to keep your facility safe and your occupants protected with minimal disruption to operations.

Resilient – D7 capitalizes on the natural cleaning power of hydrogen peroxide through the use of cutting-edge developments in chemical science.

Why it matters – This specialized formula penetrates and eliminates pathogenic bacteria, sanitizing down to the molecular level.

Versatile – D7 can be applied to exterior or interior surfaces.

Why it matters – D7 is suitable for disinfecting areas that need to be safe for public access.

Environmentally friendly – D7 contains zero VOCs, is biodegradable and is water-soluble.

Why it matters – It's safe for applicators to install and can be easily rinsed away with water after allowing proper contact time without posing harm to the environment.

Easy to apply – D7 is easily mixed and applied as direct spray, foam or fog with standard low-pressure pump or pneumatic sprayers; can also be applied by hand with a cloth.

Why it matters – There is no specialized equipment or training required for the application of D7, so application can take place almost immediately. Additionally, D7 can be applied as a foam, spray, fog or by hand wiping based on the level of sanitation or disinfection required.

Non-abrasive – D7 provides powerful and safe protection.

Why it matters – There's virtually no worry about damaging surfaces where D7 is applied.*

EPA registered – D7 meets the demands of strict environmental laws and regulatory requirements.

Why it matters – Its claims have been tested and proven true, providing you the assurance of knowing you're using an effective solution.

**D7 can stain bare brass and cause embrittlement over time (years). D7 can stain and cause slight corrosion to bare aluminum. D7 can soften and cause failure to butyl rubber o-rings, seals and gaskets. D7 requires rinsing from lexan safety guards, panels and windows.*
