Maxon Product Selection Guidance

Maxon products can meet Health Care Without Harm's Healthy Interiors criteria, version 2.3 by using the following guidance. Customer choice plays an important role in avoiding undesired chemicals and treatments. Furniture and options specified must meet all criteria below.

1. Formaldehyde*

Maxon Furniture that is Indoor Advantage™ Gold certified qualifies certificates are publicly available on our [certifications](#) page.

2. Per and poly-fluorinated Compounds (PFAS)*

PFAS-free fabrics are available. See approved fabric list above. Customers are responsible for their COM fabric content.

3. Polyvinyl Chloride (PVC)*

To avoid PVC, order HPL Systems Worksurfaces with Edgeband. Avoid specifying a curved worksurface, as these can require PVC. Some small PVC parts and PVC edges make up less than 1% of the weight of a worksurface or table and may still be accepted as meeting Health Care Without Harm's Healthy Interiors criteria. Electrical components may contain PVC, but are exempt. PVC-based vinyl upholstery must be avoided. See approved fabric list above.

4. Antimicrobials*

Antimicrobial-free fabrics are available. See approved fabric list above. Customers must be responsible for the COM fabric content.

5. Flame Retardants*

Maxon's products are free of flame retardants, but customers must select fabrics that are also free of flame retardants. PVC-based vinyl upholstery, some polyurethanes, and some high-performance textiles must be avoided. See approved fabric list above. Customers are responsible for COM fabric content and most high-performance textiles must be avoided. Customers must be responsible for Customer's Own Materials (COM) fabric content.

* Please note that it is not feasible to provide laboratory testing data for every variation of product and material. Maxon Furniture has worked with our suppliers to determine whether the chemicals and treatments listed are included in products above the guideline threshold limits. Customers are responsible for the chemical content of COM fabrics.

Maxon Furniture reserves the right to change materials without notice but will continue to pursue product offerings which meet Health Care Without Harm's Healthy Interiors criteria. Please confirm conformance to criteria at time of specification. For additional information, please contact Maxon Customer Support at: service@maxonmail.com.

This product list and guidance are current as of April 2020.
