

# MICRO-RIDER FLOOR SCRUBBER

# TENNANT T7AMR

The Tennant T7AMR is an autonomous micro-rider floor scrubber, designed to work safely and efficiently alongside employees.

Powered by BrainOS®, an advanced vision-based A.I. system, the unit will safely operate around any obstacles, ultimately improving consistency and productivity.

The T7AMR will lower operational and labor costs. The unit features ec-H2O NanoClean® technology, lowering costs by reducing water and detergent use. This unmanned solution is transforming the floor industry, discover how this unit will improve your facility.

## BENEFITS

- Clean & safe environment
- Easy-to-use
- Consistent cleaning experience
